Just had another thought. If this renovation was part of the Vivarium Project, they should pay. Maybe Chris's boss should ckeck with Burt Ewart or Mark Dusza.

Thanks,

Jim

Eric,

I was upstairs in my new office space and plugged my laptop into the wall. It was not functioning. What can we do to get it on line with the Boston server? All the plugs need to function. One will be for a copier, printer, fax, scanner unit. I will be moving up there soon.

Thanks,
